```python
**kwargs :

def add(**kwargs):
    for keys,values in kwargs.items():
        print(keys,values)
add(t="rohan",f="royal",y="rohit")

*args

# add the n number of elements
def add(*args):
    sum = 0
    for i in args:
        sum +=i
    return sum
print(add(2,3))
print(add(2,3,4,5,6))
```
